LUBRICANTES ESPECIALES S.A.

LUESA has a large and qualified technical team, which thanks to a continuous treatment with the commercial team is able to capture all needs that the customer have, in order to recommend the product more appropriate, or, if necessary, developing Taylor made products.

Our philosophy leads us to be flexible. We can be able to develop always the right product. We offer products respectful with the environment and safety for the people.

METAL AND RELATED RANGE

- | | |
|---|--|
|  Hydraulic fluids |  Metal industry |
|  Greases and pastes | Medium and Deep drawing |
|  Siderurgy | Metal Forging |
|  Gear oils | Sintered metals |
|  Special products | Machine tool |
|  Biodegradable lubricants | Tube Forming |
|  Alimentary industry (food contact products) | Fine cut |
|  Quenching fluids | Plastic deformation |
|  Building | Machining |
| | Surface Treatment |
| | Aditives |
| | Industrial maintenance |

METAL WORKING FLUIDS BY APPLICATION

	Steel	Aluminum	Yellow metals	Iron
ABRASION	MECLUB ABM			
TURNING MILLING DRILLING	MECLUB HQ			
SAW	WASOL 100 WACORT 387			
SEVERE MACHINING	MECLUB AD			
MACHINING	WASOL 100	MECLUB ALC MECLUB ABM		WASOL 100
BROACHING	WASOL 100			WASOL 100
REAMING	WASOL 100 WACORT 387			
TAPPING	WASOL 100			WASOL 100
DEEP DRILL	MECLUB TP			MECLUB TP
RECTIFIED	WASSIL GREEN	WASIN 300		WASSIL GREEN
HONING LAPPING	MECLUB HPR			
STRAIN METALS*	MECLUB TES			MECLUB TES
SPARK EROSION (SEM)	CLEARLUB 545			

* ROLLING, PUNCHING, STAMPING, DRAWING, STRETCHING

GREASES

LUESA high performance greases, are developed and manufactured for use under extreme conditions. Based on mineral oils or synthetic fluids including silicone oils; LUESA high performance greases contain some special additives to provide the most effective lubrication in any condition.

LUBRICANTS

Our range of lubricants covers all sectors and applications. We work with all types of existing lubricating fluids on the market (mineral, synthetic, biodegradable, non-toxic, vegetables, etc.) which allows us to offer the best solution for each customer problems of lubrication.

AEROSOL

We have a wide range of aerosol products for industrial applications. These include greases, multifunctional, cleaners, etc. The whole process, from manufacturing of components to filling of packaging, is done in our facilities, ensuring total quality product.

METAL WORKING FLUIDS

The complexity of the operations performed on metal parts requires a proper balance between lubrication and cooling. All our products have undergone numerous tests in order to ensure a safe and precise manner, its best performance. Our know-how and close collaboration with our customers ensures total quality of all our products.
